

30 January 2018

Dear Parent(s)/Carer(s),

Your child has been identified as working below their target grade in science. In order for them to achieve their full potential in future assessments we have created a booklet to target the areas we feel they need the most support in.

The booklet contains examination questions on different topic areas from which your child's teacher will set questions to be completed at home. These questions will be in addition to any homework usually set. Students will be able to use their books, revision guides, BBC bitesize and internet research to help them answer these questions.

At Nottingham Free School we value the support of parents and we would like to include you in the process of supporting your child to reach their full potential. Your child's teacher will identify the questions to be completed, the date to be completed by and estimated time required to finish the task. We would appreciate your support by using the feedback sheet, to note how much time your child actually spent completing the task, how they found the task and any additional support you feel your child needed to complete it. This will help us to further develop our intervention strategies and create a dialogue between teachers and parents to fully support your child's learning.

Thank you for your support in this matter and if you have any further questions then please do not hesitate to contact me.

Kind regards

Yours faithfully

Mrs G Johal
Head of Science
